Title: Blood Bank Donation Project

Presented by: Shaik Abdul Ahad

Course: Software Engineering

University: Port City International University

Date: [Insert Date]

Introduction

Objective of the Project:

- ○ To develop an efficient and user-friendly blood donation management system.
- ○ To facilitate the process of blood donation and ensure a steady supply of blood for medical emergencies.
- ○ Importance of blood donation in saving lives.

Objectives

- **Primary Goals**
  - To establish a user-friendly interface for donors.
  - To maintain a comprehensive database of donors.
  - To facilitate communication between donors and blood banks.
  - To ensure a safe and efficient blood donation process.

Database Design

- **Key Tables**
  - **donars**: Stores information about donors.
  - **blood**: Stores different blood types.
  - **donar_details**: Detailed information about donors.
- **Database Relationships**
  - Relationships between tables for efficient data retrieval.

Technology Stack

- **Frontend Technologies**
    - HTML, CSS Framework Tailwind CSS & daisyUI — Tailwind CSS Components,.
- **Backend Technologies**
    - PHP for server-side processing.
    - MySQL for database management.
- **Development Tools**
    - phpMyAdmin for database management.
    - XAMPP for local server setup.

User Interface

- **Design**
    - Simple and intuitive design for easy navigation.
    - Use of Tailwind CSS for responsive design.

User Interface

- **Why Should I Donate Blood Page:**
  - Informative section outlining the importance and benefits of blood donation.
  - Engaging visuals to motivate users.

Challenges and Solutions

- **Challenges Faced**
  - Data security and privacy concerns.
  - Ensuring user-friendly design.
- **Proposed Solutions**
  - Implementing secure login methods.
  - User testing for feedback and improvements.

Future Implementations

- **Admin Panel Features:**
  - **Login Portal:** Secure access for administrators to manage the system.
  - **Dashboard:** Overview of donor statistics, blood inventory, and donation history.
  - **Add Donor Functionality:** Easily add new donors and manage existing records.
  - **Donor List:** Display a comprehensive list of all registered donors with search and filter options.

Conclusion

- **Summary:**
  - The Blood Bank Donation project aims to streamline the blood donation process.
  - Future implementations will enhance the system's functionality and user experience.
- **Thank You!**
  - Questions and feedback are welcome.
